Powered Roller Conveyor

FOCUS Integration, LLC

For years **FOCUS** has been providing heavy-duty conveying equipment to a variety of industries. We now introduce our new and improved powered conveyor platform. This new platform utilizes A close roller centers for stable conveyance of unit loads. Construction is of heavyduty **B** structural design with round cross-tubes **(** for cleanliness. The 1-Hp, AC motor **①** coupled to #60 chains will provide years of maintenance-free reliability. Also included are double scrolled chain guards (F) for improved safety and adjustable leveling pads Gas standard to make installation easier and faster. This new design platform will be consistent throughout FOCUS' entire line of conveyor systems including turntables, chain conveyors, and the like.

Features

- Compact, heavy-duty design
- 1-Hp, AC drive motor
- #60 chain driven live rollers
- Round structural cross tubes
- Adjustable leveling pads
- Close roller centers
- Fully welded construction
- Double scrolled chain guard

Specifications

Conveyor Weight

1,200 Lbs

Load Size (Standard)

Up to 50" width

Variable length

Up to 4,000 Lb weight

Conveyor Dimensions

Custom per application (see reverse)
